

SoonerCare Fax Blast

April 10, 2009

SUBJECT: FREE Developmental Screening Tools and Support Now Available

Dear SoonerCare Provider,

Formal **Developmental Screening** using evidence based tools is recommended by the American Academy of Pediatrics for infants and toddlers.

The OHCA reimburses this type of screening using code 96110 when an evidence based screening tool is used.

In order to help you adopt quality developmental screening practices, the OHCA has partnered with other state agencies to make available **evidence based screening tools FREE OF CHARGE** to practices that serve SoonerCare infants and toddlers.

Participating practices will also receive technical assistance and support from trained professionals on how to best use the screening tools and resources for referral.

We encourage our contracted PCPs, who serve infants and toddlers, to review the following attachment and call **1-888-803-6391** for more information.

We believe you will find this service valuable and we appreciate your interest in providing quality primary care services to our youngest SoonerCare members.
