OHCA to offer adult vaccines to members

OKLAHOMA CITY— Payment for potentially life saving vaccines for adults, including the new HPV vaccine, was recently approved by the Oklahoma Health Care Authority Board giving Oklahoma providers additional weapons in their arsenal against deadly diseases and cancer.

The action will allow coverage for adult immunizations per the Centers for Disease Control and Prevention (CDC) Advisory Committee on Immunization Practices (ACIP) guidelines. Additionally, in June 2006, the ACIP voted to recommend use of the quadrivalent human papillomavirus (HPV) vaccine, Gardasil, in both the adult and children’s vaccination schedules. Routine vaccination with three doses of the quadrivalent HPV vaccine was recommended for females 11-12 years of age. ACIP also recommended catch-up doses for females ages 13 – 26 who have not been vaccinated previously or who have not completed the full vaccine series. According to guidelines, the vaccine should be administered before potential exposure to HPV through sexual contact.

The vaccinations will be covered by SoonerCare for females age 9 through age 18 under the Oklahoma Vaccines for Children program through the Oklahoma State Department of Health. The new rule approved by the board will provide coverage for older females, age 19 through age 26, under the adult program.

“By maintaining the recommended immunizations, SoonerCare members, their families and communities are protected from serious and often life threatening infections,” said Dr. Lynn Mitchell, state Medicaid director. “This rule will reduce the risk to public health, safety and the environment by offering safe and effective protection from infectious diseases.”

The rule change was approved by the governor and was implemented Jan. 1.
