### OHCA to Launch SoonerCare Health Management Program

OKLAHOMA CITY – The Oklahoma Health Care Authority (OHCA) is set to launch an innovative and comprehensive health management program beginning Feb. 1. This two armed program called The SoonerCare Health Management Program (HMP) aims to benefit both SoonerCare members who have chronic conditions as well as the SoonerCare Choice primary care providers (PCP).

SoonerCare Choice primary care providers will be encouraged to work with a Practice Facilitator (PF). The Practice Facilitator will work with and for the practice to enhance quality and efficiency. Providers who participate will not only receive financial incentives, but will also have access to a data base designed to track best Evidenced Based Practices.

Quality conferences and regional collaborative training sessions will be available to SoonerCare Choice (PCP) practices statewide. Provider education offerings will work to improve chronic and preventive care services for SoonerCare members and build strong community partnerships.

SoonerCare Choice members will be selected for the program using predictive modeling software. The software will identify SoonerCare Choice members who, based on their history, are at highest risk for adverse outcomes and increased health care expenditures. Most of this risk is driven by co-morbid conditions such as: congestive heart disease, coronary artery disease, hypertension, and diabetes that increase the likelihood of a health care crisis.

Depending on their level of risk, members will receive intervention by a nurse care manager (NCM), either by phone or in person. The NCM will provide education support that is specific to the member's condition, help coordinate care and improve self-management skills. Initially, 5,000 SoonerCare Choice members will be targeted for this comprehensive nurse care management program.

More information about the program is available on OHCA's Web site at: [www.okhca.org](http://www.okhca.org) or by calling 866-539-0365.

This publication is authorized by the Oklahoma Health Care Authority in accordance with state and federal regulations.
